MULTIPLIER EVENT (23/12/2022) MINUTES

Project Title: **“PROGRESSION”**

(Contract Number: 2021-1-HU01-KA210-ADU-000035074)

The multiplier event was held on 23rd of December 2022, in the conference room of the Local Directorate of National Education in Bozyazı. 31 participants (directors of the public authority -governorship of the city and the local directorate of education-, teachers, educators and principals of the schools) were involved in the event.

An introduction was given to the participants by Mesut Budak and Gülname Kayhan at the beginning of the event. Firstly, Gülname Kayhan explained the Erasmus+ Program and its opportunities and main objectives for the adult citizens. The main objectives and activities of the Progression project and the aims of the multiplier event of the project were explained. Then, the vice-headmaster of the directorate -Ali Bulut- made an opening speech and he told the guests that the local authorities and the NGOs in our city have been working hand in hand for the sake of the betterment of the lives of all citizens but especially the one with disadvantages.

In the second session, all outcomes of the project were introduced: its methodology, outputs, our educational objectives, and the activities that have been implemented by both the project coordinator -Crime Stop Alapitvány- and Bozyazı Kültür Sanat ve Müzik Derneği. The president of our association, Mesut Budak, explained the motivation of the both of the partner organization and the target groups of them. He showed and explained the PPT slide which was consisting of a summary of the project and a few photos that were taken in Bozyazı and Budapest during our transnational project meetings.

Gülname Kayhan and Ayhan Sezdirmez explained the ways how could “dual education methodology” and adaption of Bloom's Educational Taxonomy applied into the adult education field. The methods of interrelating digital competences and art were explained by them and there were also new suggestions and ideas that were proposed by the participants. These ideas and suggestions were in fact very important for us. Because most of the participants of the event were educators or directors of our local education authority. The vice-headmaster of the local directorate said that there was a public adult education centre and school directly bound by their authority and that centre was dealing with adults and mostly coming from very disadvantaged groups. He proposed to the president of our association to prepare a new project with this public adult centre.

In the third session, there was a break and the guest were served drinks and pastery. They could have conversation about the project's main subjects and its activities and their own project ideas. They could also get the opportunity to hear from our teachers about our current activities and other project plannings.

In the last session of the event, the questions and answers were taken from the participants and the representatives of the association. The multiplier event brought an extra added value for us. It was very beneficial for the dissemination of the Progression Project and also for the recognition and promotion of our association in our city and region.

It provided us to introduce the participants:

- # The methods, techniques, practices for improving and interconnecting art abilities & digital competences of adults especially adults with disadvantages
- # The methodology of “Dual Education”, Bloom Taxonomy and implications of our project for giving life to Actor Networks Theory in local activities
- # Aims, results and future implications of the project and its activities
- # The outputs of the project such as the professional works, and practices of the learners and our methodological framework
- # After the event, the guests were also invited to visit our association in anytime they can. It will also provide us new opportunities for info-sharing and showing them the photos/videos/activities realized/produced by the Progression Project and our other activities.
